

David Antonioli – Bio

15 March 2010

David Antonioli has more than 10 years experience working in the carbon market in a variety of different roles, having worked as a consultant with ICF International, a USAID representative in Mexico, and a project developer with EcoSecurities where he developed a portfolio of CDM landfill gas projects and led the company's efforts in the voluntary sector. As the CEO of the Voluntary Carbon Standard Association (VCSA), David oversees the operations of the VCS, whose mission is to provide a rigorous, trustworthy and innovative global standard for the development of greenhouse gas offsets, and which is serving as the basis for the development of offset programs within compliance regimes worldwide. The VCS is one of the leading standards in the voluntary carbon market and, through its development of the buffer reserve mechanism, is widely credited for bringing REDD projects into the carbon market.

David holds a Bachelor's Degree from Princeton University and a Masters Degree in Public Policy from the John F. Kennedy School of Government (Harvard University).
