

Carol Miu is a Senior Economist at Economists Incorporated's Washington, DC office. She specializes in survey methodology, experimental design, and quantitative modeling. In the contexts of antitrust litigation, Fair Labor Standards Act enforcement, and merger analysis, Carol has analyzed survey and market research data and provided critiques on survey design, sampling methodology, and statistical reliability. She has designed sampling plans for advertising research and tested the statistical significance of potential advertising claims. Her industry expertise includes retail, airlines, casinos, chemical products and feed additives, media licensing, pharmaceuticals, healthcare, and telecommunications. Carol won the 2008 Allen G. Krowe Teaching Award at the University of Maryland, where she taught consumer behavior to undergraduate marketing majors. She is an active member of the American Marketing Association and chaired the judging committee of the 2009 M Awards, which recognized excellent marketing by firms in the DC metropolitan area.
